

# FICCI

## URBAN INNOVATION & FUTURE CITIES MEET

3<sup>rd</sup> Smart Cities Summit  
2019

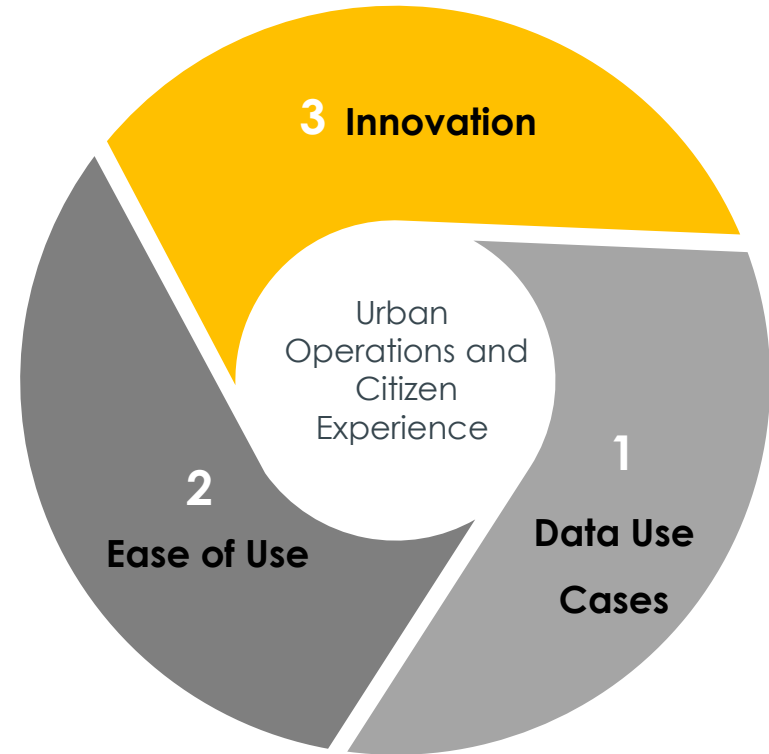

Intelligence powering every  
city

# Discussion Topic

---

## Digital Transformation: Beyond Digitisations

# Digital Transformation Use Cases

---

## Data Sources

Amount of Data that city will generate not only in IoT but Open Data sources, Partner Data , IT & OT eGovernance Data is going to generate tremendous cross vertical uses

## Analytics Applications

Urban Planning  
Safety & Surveillance  
Planning  
Route Optimization  
Water Clotting

# Ease of Use

## Smart City Interaction Points

Safety and Security

Traffic Management

Lighting and Energy

Pollution/Environment

Building Management

Parking Optimization

Water Management

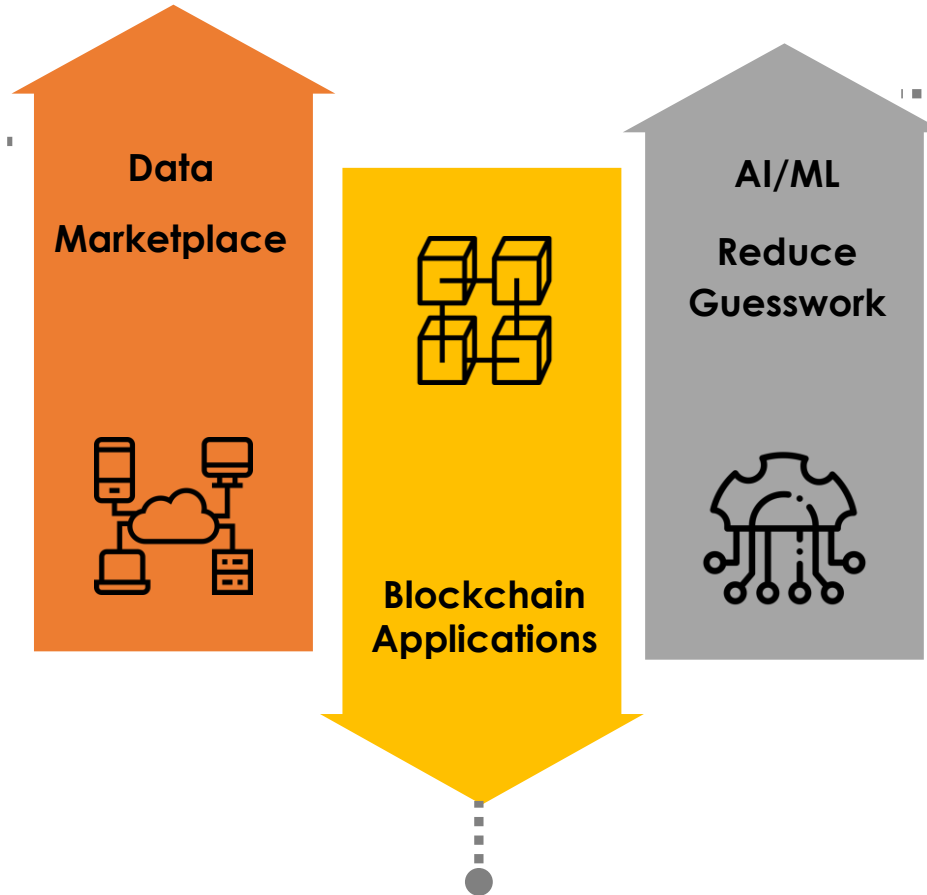

Waste Management

# Innovation

Data generated by cities continues to grow and creates a data marketplace for G2C and B2G2C solutions

Data generated by sensors and other sources parsed through AI and ML models take away significant portion guesswork from Urban planning and make the future investments more certain and viable

Transaction security and trust creating avenues in property records , education systems and other monetary interactions
